

Hydraulic Roof Bolter

Micon Hydraulic Roof Bolter is a Rotary Roof Bolting Machine Suitable for drilling vertical holes of 27mm - 32 mm dia, depth upto 1.8 Mtrs & anchoring of the Roof Bolts in underground Coal mines in Strata Up to 600 kg/ cm².

It can run with Hydraulic Tapping from any underground machinery like SDL's, LHD's or Dosco Road Headers or and independent Power pack.

The most Salient Feature of this Machine is that it has all operational controls on the handle of the Pivoting Control Arm it self. The control Arm can be pushed down to the Leg where it is automatically locked, facilitating easy transportation. In operating position, it allows total control over the drilling operation as well as the safety of the Driller.
